Paper-Making and Collage  
*Online Course*

**Instructor:** Eric Hibit

**Description:** Art in the kitchen sink. Learn how to re-constitute a variety of papers with water and a blender and form the paper pulp into sheets in this online course. Use acrylics to tint pulp to create a variety of colors. Explore using other materials as inclusions, and how to build layers of pulp to create dimension. The papers made in the class could be the foundation for other collage materials, or themselves cut up and collaged with, or any combination.

NOTE: special materials are required, and drying times are long; space is required to store paper while drying; it is a project that is suited for online/at home.

**Supply list:**
- blender
- electric fan
- leftover cardboard from boxes
- a wire mesh sieve
- a metal baking rack
- containers for soaking paper (large yogurt containers, bowls, etc)
- plastic wrap
- scissors
- 16 oz. matte medium
- set of fluid acrylic paint
- a brayer
- masking tape
