PHONE-ography 101

Instructor: Stephen Sherman

Course Description:
Your smartphone has become your go-to cameras of choice. It is always with you. Do you want to learn how to unleash it's potential and your creativity? New York-based photographer Stephen Sherman takes you through some of his favorite apps for shooting, editing and sharing, and also some accessories that help you get the most from your phone’s camera.

The first of two sessions will be about shooting images with your phone and will include a discussion and practical on camera apps, including discussion of HDR, Panorama, image quality, and camera settings.

The Second session will concern itself with managing and editing your cell phone images and include a discussion and practicals on various methods of editing, transferring and managing your pictures.

Supply List:
Please make sure your Phone is fully charged when you come to class and if you use an iPad or tablet, you might want to bring it to the second class.

Welcome New Students,

Please bring your phone and a connecting/charging cable with you. If you have an iPad, you might want to bring that to the class as well. If you are using any additional hardware with your camera phone, please bring it.

My contact information is below if you need to reach me or have any questions.

I look forward to meeting you,
Stephen Sherman
